Wellogix's advanced services include DrillTeam<sup>SM</sup> and FieldTeam<sup>SM</sup> for faster, more accurate collaboration among operator and service provider team members, eField-Tickets<sup>SM</sup> for faster reconciliation of invoices with actual cost, MyWellogix<sup>SM</sup> for prioritization and specification of optimum workflow paths, and Profile Links<sup>SM</sup> to allow service providers to push highly complex product information to their customers. For additional information on these services, please contact the Wellogix sales department at 281-493-4141.

### Collaboration Manager<sup>SM</sup> *Improve Communication*

An advanced, project-specific, multi-user communications platform, the Wellogix Collaboration Manager allows operators and service providers to interact quickly and efficiently on job specifications, project details or pricing information, and saves that project-specified communication electronically for future references. With Collaboration Manager, detailed input from all team members is visible for the entire project team to see.

### DrillTeam<sup>SM</sup> *Optimize Collaboration*

An online project management tool that gives visibility of a common data set to oil and gas company engineering teams, allowing them to jointly specify requirements for well drilling, completion, and workover operations. Using DrillTeam, companies can utilize the expertise of team members from across the globe as if they're in the same room.

### eField-Tickets<sup>SM</sup> *Facilitate Reconciliation*

An online version of the invoice reconciliation process currently employed for reporting oilfield operational costs and for reconciliation of expenses before payment, through optional connectivity to existing ERP systems. Using eField-Tickets, operators enjoy a reduction in invoice processing times and service companies can decrease the length of their payment cycles.

### FieldTeam<sup>SM</sup> *Service Provider Collaboration*

FieldTeam allows service provider sales and engineering project teams to jointly specify proposals, quotes and technical feedback for well drilling, completion and workover operations in cooperation with any external experts the company uses, all online and from anywhere with Internet access.

### MyWellogix<sup>SM</sup> *Prioritize Workflow Paths*

With MyWellogix, customers have the ability to personalize individual workflow paths in their Wellogix user accounts, specifying which tools and screens they prefer to see when logging in, and their preferred pathways through the software. MyWellogix includes unique profiles to support access from both desktop computers and handheld personal computers.

Profile Links<sup>SM</sup>  
*Differentiate Your Services*

A highly targeted form of service differentiation, Profile Links allow service providers to offer specific, detailed information about the quality of their products and services to buyers at the precise point of a purchase decision.
